DETAILED ACTION

*Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:  
  
Group I., Claims 1-4, drawn to Semiconductor Device, classified in class 257, subclass 225+.  
  
Group II, Claims 5-10, drawn to Method of Manufacturing Semiconductor, classified in class 438, subclass 14.
2. The inventions are distinct, each from the other because of the following reasons:
3. Inventions Group II and Group I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the device of Group I can be manufactured by forming a plurality of identical semiconductor chips on the semiconductor wafer and dicing each the semiconductor chips and dividing one or more plurality pieces before conducting testing and carrying out a quality test for each divided semiconductor chips.
4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 2823

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
